Experiment - 06

Simulate the lifecycle stages for UI design using the RAD model and develop a small interactive interface using Axure RP

RAD Model Applied to Mobile Login & Verification System

RAD (Rapid Application Development) is a methodology that focuses on **fast development, prototyping, and user feedback** instead of lengthy planning. It is suitable for UI-based applications like this mobile login system.

Phase 1: Requirements Planning

This phase defines the system goals, features, and user needs.

1) Identify Key Features

Navigation Flow

- Login Screen
- Mobile Number Entry
- OTP Verification
- Login Success Screen
- Home Dashboard

User Actions

- Enter mobile number
- Request verification code
- Enter OTP
- Submit and login
- Access home page
- Browse/upload documents

2) Requirements Document

1. User should be able to log in using a mobile number
2. System should send a verification (OTP) code
3. User should enter OTP to authenticate
4. System should validate OTP and allow login
5. Show login success confirmation
6. Redirect user to home dashboard
7. Allow user to browse/upload documents

Phase 2: User Design

In this phase, UI/UX is designed with continuous user involvement using prototyping tools like Axure.

1) Tools Used

• Axure RP – for wireframes and prototypes
• Prototype mode – to simulate navigation and interactions

2) Wireframes Designed

Login Screen

• Displays user avatar
• Button: *Login with your mobile number*
• Options for Google and Facebook login
• Links for register or alternate login

Interaction:
Clicking login → navigates to mobile number entry screen

Mobile Number Entry Screen

• Input field for 10-digit mobile number
• Button: *Send Verification Code*
• Security icon for trust indication

Interaction:
User enters number → clicks send code → moves to OTP screen

OTP Verification Screen

• Displays message that OTP is sent
• Four input boxes for OTP entry
• Continue button

Interaction:
User enters OTP → clicks Continue → system validates

Login Success Screen

- Displays message: *Login Successful*
- Minimal UI for confirmation

Interaction:
Automatically redirects to Home screen

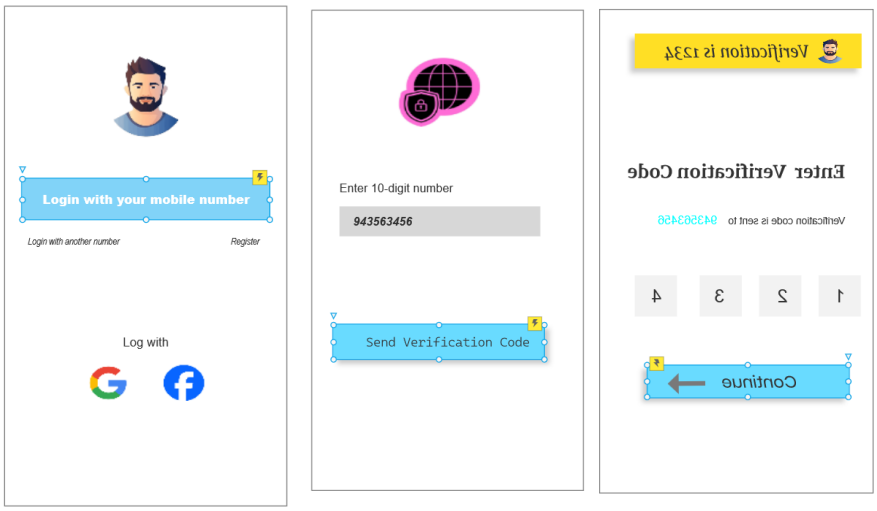
Home Screen / Dashboard

- Welcome message
- Security-related illustration
- Option: *Browse your Documents*

Interaction:
User can upload or view documents

3) Design Highlights (RAD Principles Applied)

- Rapid UI prototyping instead of detailed documentation
- Continuous feedback from users during design
- Reusable components (buttons, layouts)
- Quick iterations and improvements
- Focus on user-friendly interface



Login with your mobile number
Login with another number
Register
Log with
Enter 10-digit number
943563456
Send Verification Code
Verification is 1234
Enter Verification Code
Verification code is sent to 943563456
