Experiment - 08

AIM:

The aim is to create storyboards representing the user flow for a **mobile Meditation and Wellness app** using simple UI design.

PROCEDURE:

1. Tool used: Wireframing (Balsamiq or similar).
2. Created mobile screens to represent user relaxation journey.
3. Designed each screen for meditation, focus, and sleep sessions.
4. Used UI components like buttons, icons, search bar, and cards.
5. Maintained a simple, clean, and user-friendly layout.

USER FLOW:

1. Homepage
2. Explore Screen
3. Session Player Screen
4. My Library Screen

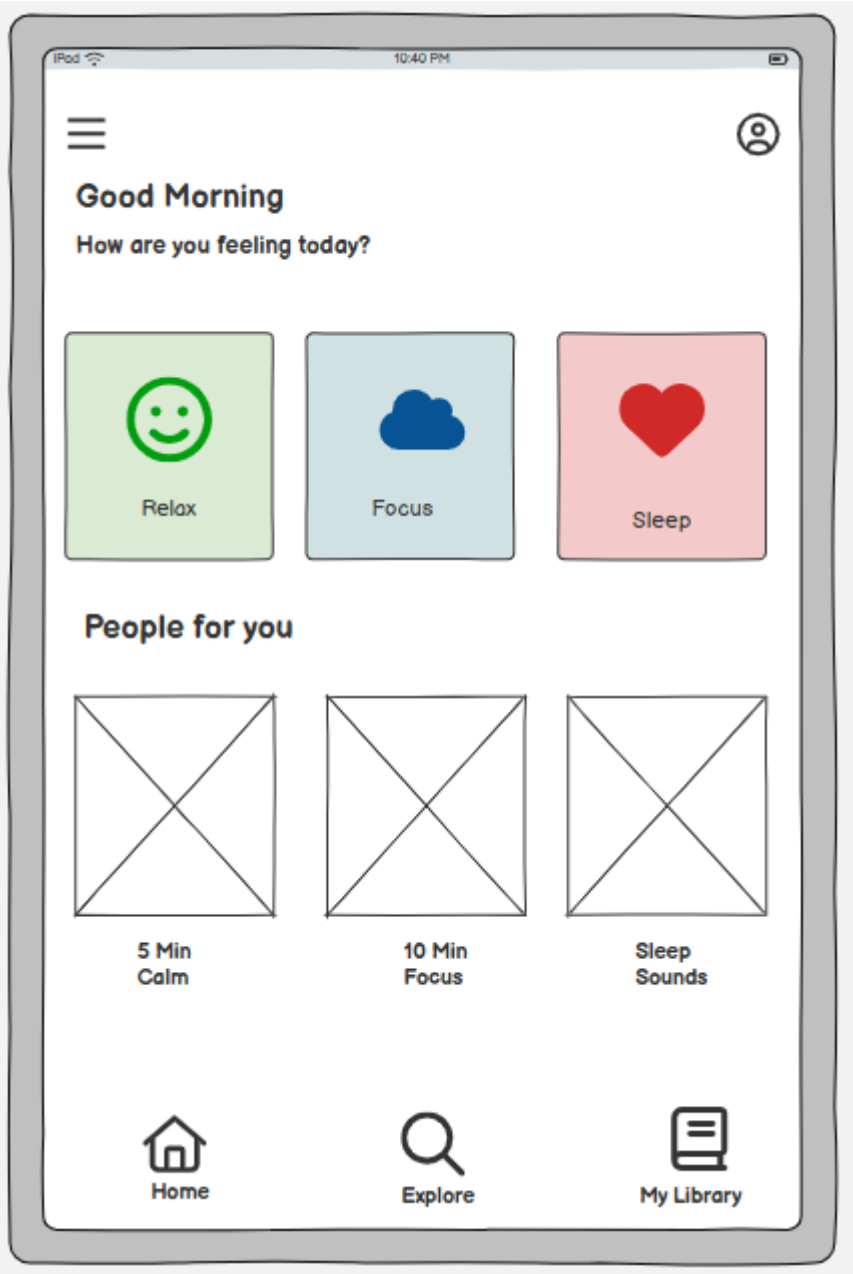
1. HOMEPAGE

Components:

- Greeting text (“Good Morning”)
- Question (“How are you feeling today?”)
- Category buttons (Relax, Focus, Sleep)
- Recommended sessions (cards with time & title)
- Bottom navigation bar

Purpose:

Starting point where users select their mood or activity for relaxation.



2. EXPLORE SCREEN

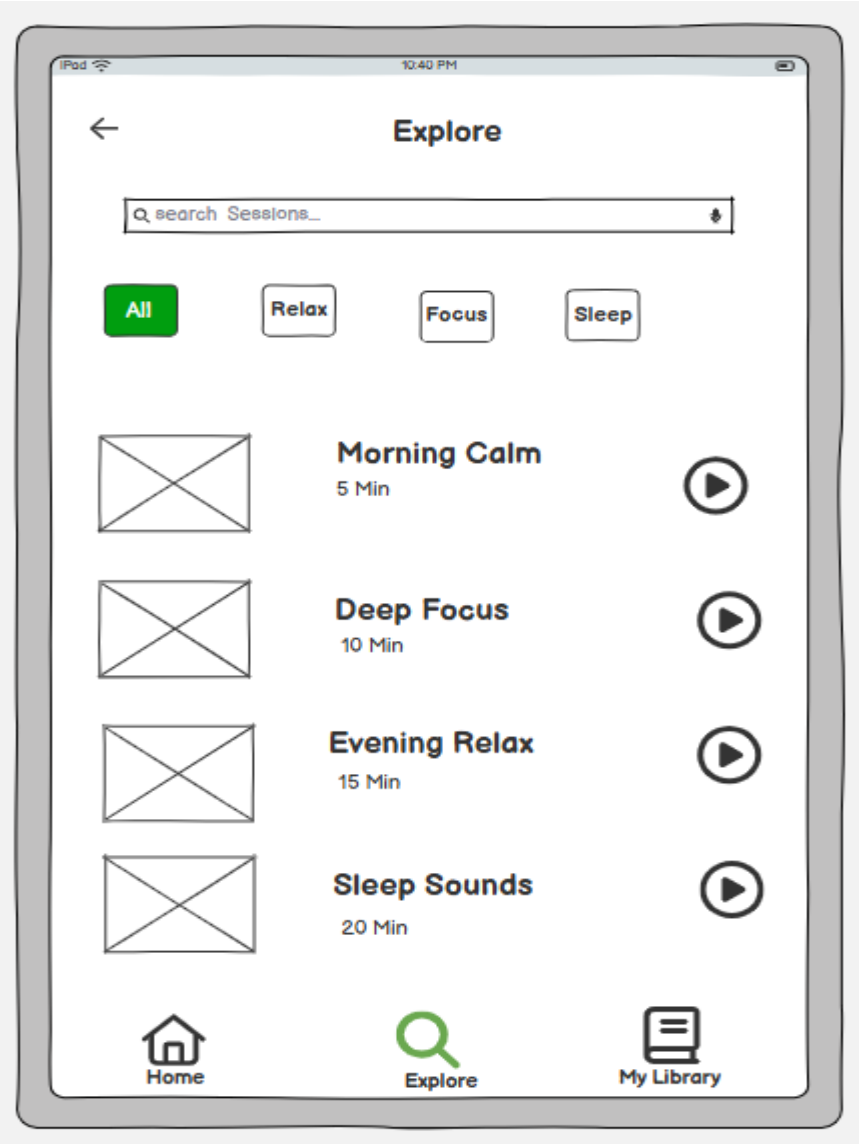
Components:

- Search bar ("Search sessions…")
- Category filters (All, Relax, Focus, Sleep)
- List of sessions (Morning Calm, Deep Focus, Sleep Sounds)

- Play button for each session

Purpose:

Allows users to browse and find meditation sessions.



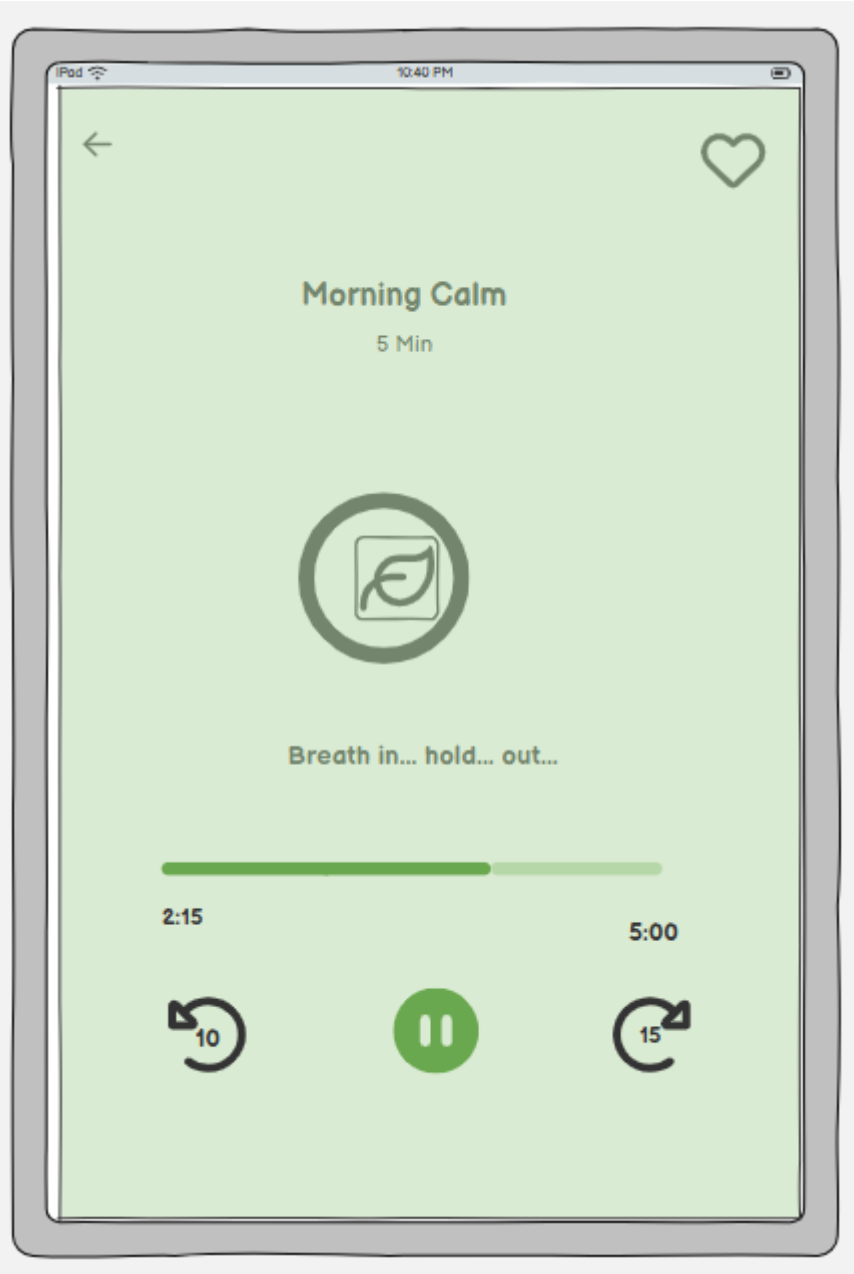
3. SESSION PLAYER SCREEN

Components:

- Session title (e.g., “Morning Calm – 5 min”)
- Play/Pause button
- Timer/progress bar
- Background visuals (calm theme)
- Forward/backward controls

Purpose:

Lets users listen and follow the meditation session.

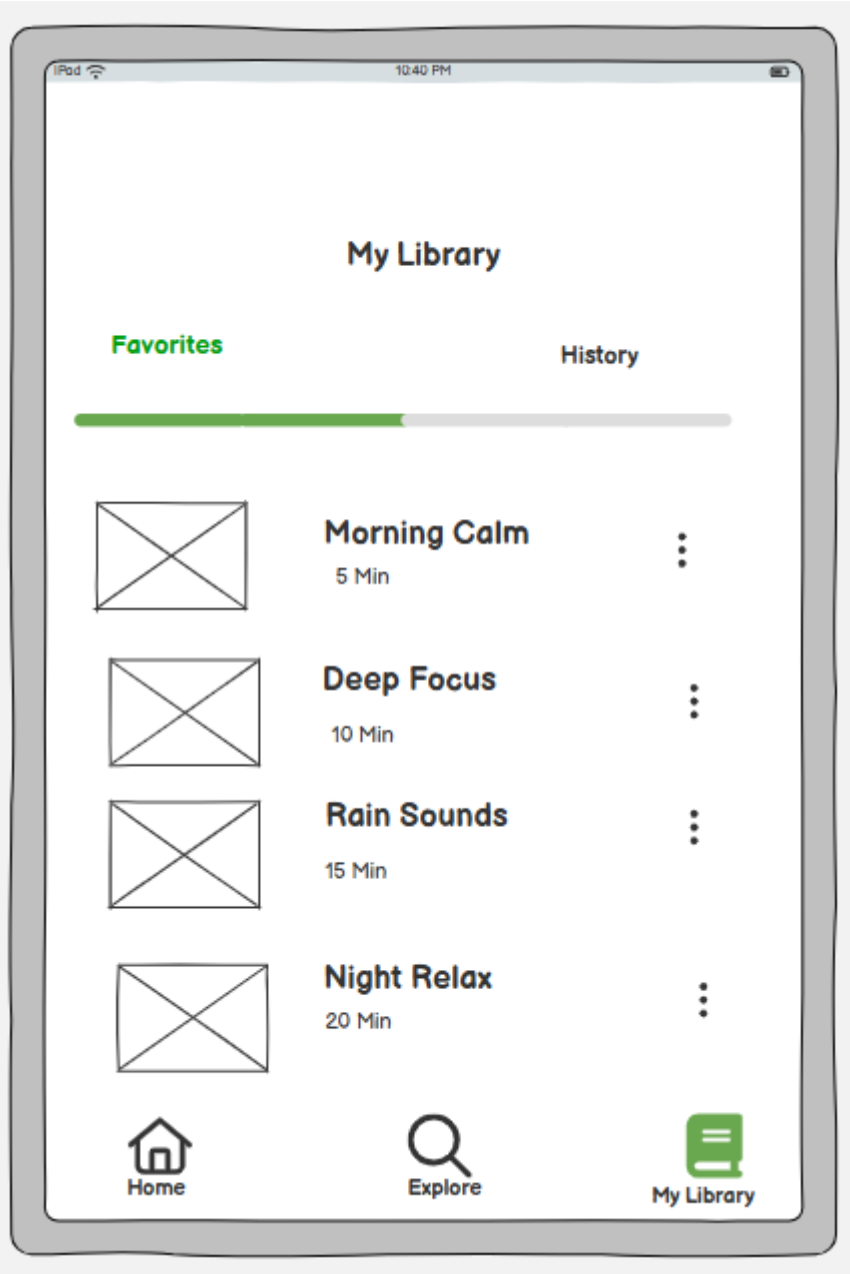


4. MY LIBRARY SCREEN

Components:

- Tabs (Favorites, History)
- Saved sessions list
- Session details (name, duration)

- Navigation icons

Purpose:


Stores user's saved and previously played sessions.
